SKILLS

EDUCATION

PROFESSIONAL EXPERIENCE

2016 - PRESENT

Qa Automation Leader CONSIS INTERNATIONAL

- Leading a team of Automation Engineers and providing guidance on technical issues
- Developing and maintaining automated test scripts using various tools and programming languages
- Collaborating with cross-functional teams to identify and prioritize automation needs
- Developing and implementing automation strategies and frameworks
- Continuously improving and maintaining existing automation frameworks
- Creating and maintaining test documentation, including test plans, test cases, and test scripts
- Identifying and reporting defects and issues to the development team
- Tracking and reporting automation metrics and key performance indicators
- Collaborating with development and operations teams to understand the CI/CD pipeline architecture and identify opportunities for implementing E2E tests
- Creating and maintaining E2E tests using automation tools and frameworks

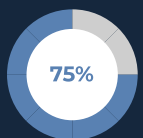

Technologies used
Selenium, rest assured, allure reports, java, javascript, appium, cypress, Testng, Junit, mocha, chai, cucumber, jmeter, postman, jenkins, Jira, Confluence, Xray

2015-16

Technical Leader MOVISTAR

- Established QA standards and best practices that have been adopted organization-wide, resulting in improved software quality and faster delivery times
- Assist in coaching junior staff by helping them make decisions, solve problems, manage meetings, set goals, provide feedback on testing-related tasks, delegate and assign testing responsibilities
- Oversee projects to ensure that work is scheduled based on priorities, risks, and team strengths, and assign resources across projects accordingly
- Oversee the testing of software features and ensure that they meet quality standards and acceptance criteria
- Review and re-evaluate test strategies to adjust for new information, changing risks, shifting priorities, and schedules
- Create and maintain test plans and strategies that align with project objectives and timelines
- Review client requirements and provide feedback to ensure that they are complete, testable, and aligned with the project goals
- Oversees the creation and maintenance of test data and test documentation

Technologies used
Mysql, Oracle, postman, Soapui, HPQC, Remedy, Project, Trello

2014-15

C# Developer GRUPO JEXO

- Design, develop, and test new features in the ticket management application
- Collaborate with other developers, product owners, and stakeholders to define requirements and ensure smooth delivery of new features
- Participate in agile Scrum processes to ensure timely delivery of high-quality software
- Provide support to end-users, troubleshoot issues, and implement bug-fixes as needed
- Continuously improve the quality of code, processes, and practices

Technologies used
Mysql, C#, WPF

2012-13

QA SR FYC GROUP

- Meeting with the software/product designers to determine quality assurance parameters.
- Leading the QA team in designing QA test procedures.
- Overseeing the drafting of testing documents.
- Implementing testing procedures and overseeing the QA process.
- Troubleshooting quality issues and modifying test procedures.
- Conducting analysis checks on product specifications.
- Reviewing Quality Assurance reports.
- Ensuring the successful deployment of products into the market.
- Responding to requests from the design team and management.

Technologies used
Mysql, Oracle, postman, Soapui, HPQC
